

How To Become Great At TikTok Ads

How To Launch, Test, Optimize & Scale Like A Pro

Will Perry, Founder

Elite Media Buyers Academy

REASON Media

FutureKontent

Hey, I'm Will Perry.

- Founder: Elite Media Buyers Academy
- Founder: REASON Media
- \$60M+ Ads & Sales
- 15+ years in digital marketing
- Doing the nomad thing right now = pretty awesome

The journey of this course

Lesson 1

**Creative 101:
Mastering The
Fundamentals**

Lesson 2

**Creative 201:
The Research**

Lesson 3

**Creative 301:
How To Make
Tiktoks That
Convert**

Lesson 4

**Setup &
Testing**

Lesson 5

Optimization

Lesson 6

Scaling

This program is:

1. For:

- a. **Agencies** - who want to run Tiktok ads for their clients
- b. **In-house marketers** - who have run ads before, that want to scale an additional channel
- c. **Media buyers** - who want to run Tiktok ads for their clients, want to diversify from Facebook

2. Advanced:

- a. This isn't a how-to course on how to "run" ads
- b. This program is geared toward how to win / scale an additional channel
- c. Assumes you've run ads before and have knowledge of paid traffic

Creative 101: Mastering The Fundamentals

Testing**

Lesson 5

Optimization

Lesson 6

Scaling

Creative 101: Lesson Objectives

In this lesson, we will cover:

1. Current Best Practices

- a. Discover fast and effective ways to produce creative without the guesswork of what to do, where to start and where your best chances of success lie

2. Top Performing Creative Types

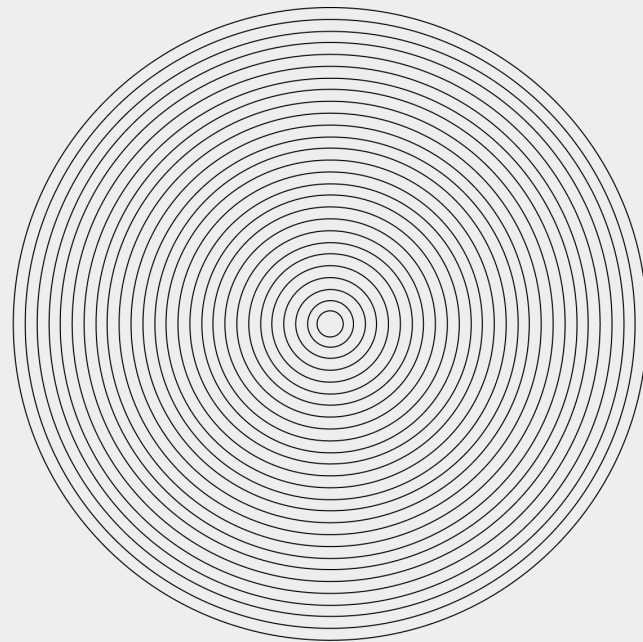

- a. Understand the different types of creative, how to best develop those ads

3. Top Performing Creative Angles

- a. Understand the different angles to take with creative, how to best develop those ads

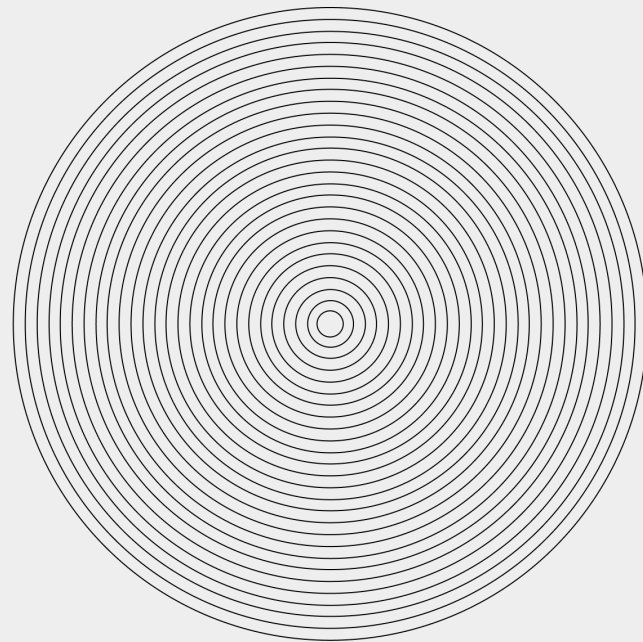

Creative Best Practices

- Being native is more important than in any other channel. If you're creating an experience that causes people not to use the app, ***you're going to be charged more (CPM).***
- Text overlay to communicate any hooks
- Follow trends: sounds, editing, styles
- Length - 15-30s
- Needs to be quick snippets of 3-5s video
- Refresh creative approx. 7-14 days
- Use phone apps like In-Shot or CapCut to edit clips together
- Must have sound
- CTA's at the end

Creative Best Practices

- Ending CTA = 152% lift in conversions
- 5+ scenes = 171% lift in conversions
- 21-34s = 280% lift in conversions
- V/O with Offer = 81% lift in conversions

Overall Best Practices

Offers with highest profitability (Best chance of success)

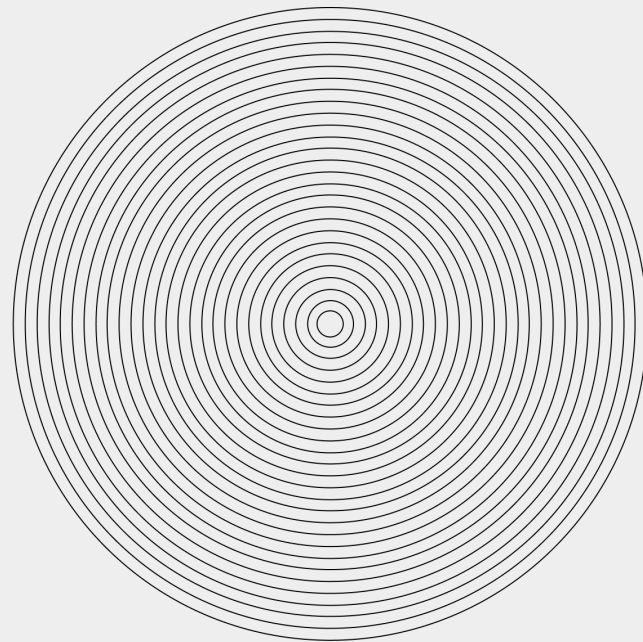

- Lead Gen: High Ticket (\$1000+) - Service-Based Biz
- Ecomm: High Ticket (\$1000+) - Coaching Programs
- Ecomm: High AOV (\$100+) - Any industry
- Ecomm: Trial to Subscription (\$1-\$9) - Any industry

Offers with lowest profitability (Worst chance of success)

- Ecomm: Low AOV (< \$75) - Any industry

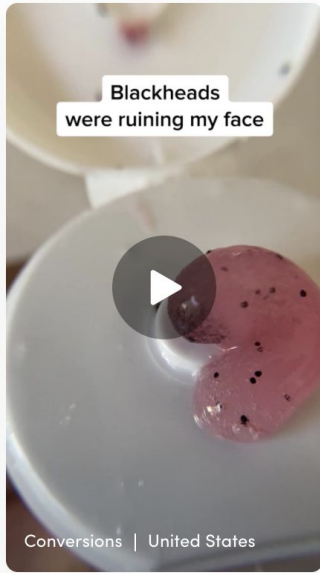

High Ticket or Recurring = profitable + growth

Low AOV = losing money + pain

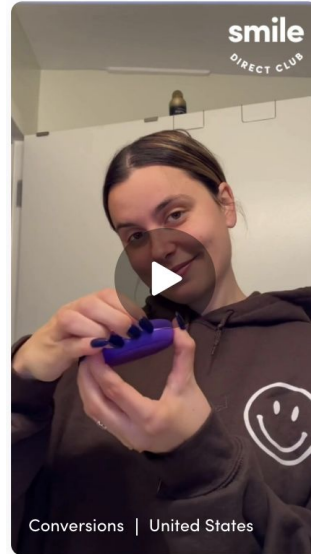

The best ads
create intent.
CXL

Creative Types

Native Creator Content:
GOLD STANDARD

Native Brand Content:
not overly designed

Branded Content:
text overlay with audio

Best Performing Creative Angles

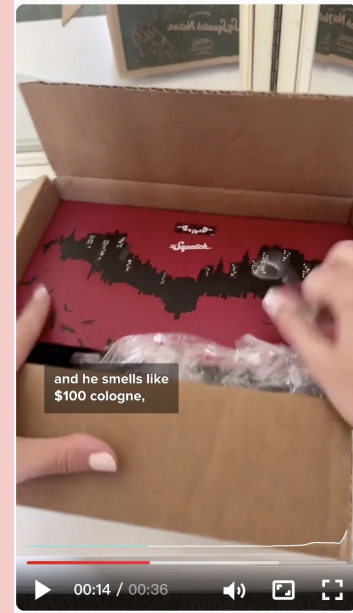

1. Product Unboxing
2. Product Demo
3. Step-by-step guide
4. Testimonial/Review

Why these angles work

1. Build anticipation & curiosity on what it is like to receive - like getting a gift
2. Shows the product in use, how it works, who it's for
3. Overcomes objections through use
4. Shows authentic responses by real people using it, which influences others to buy

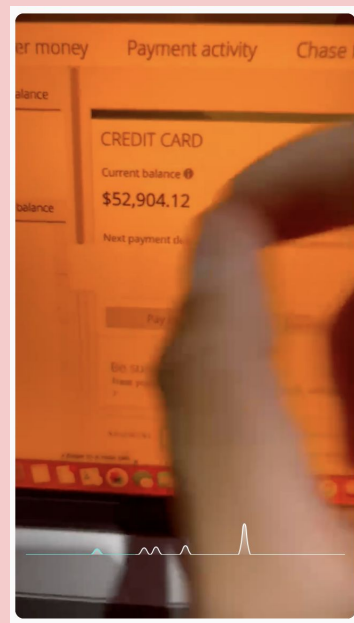

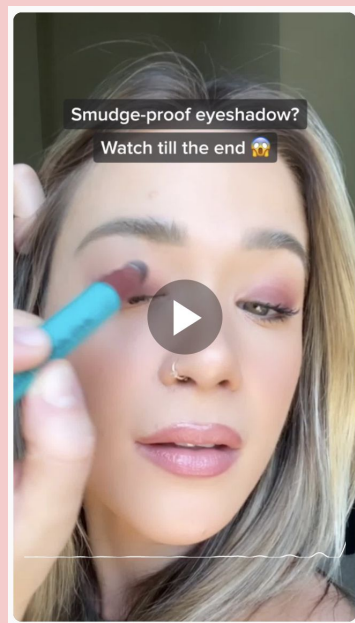

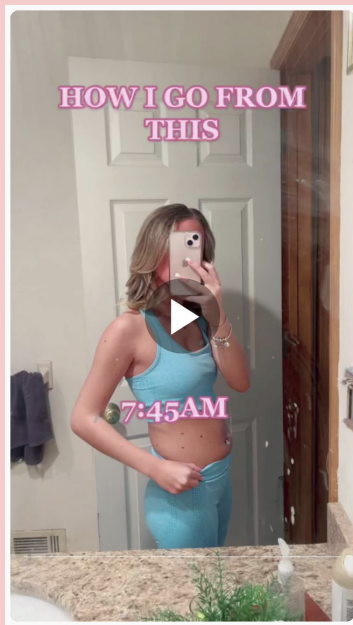

Best Performing Creative Angles: Examples

Product Unboxing

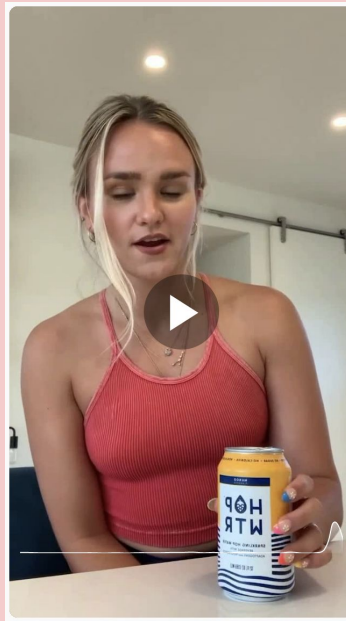

Best Performing Creative Angles: Examples

Step-By-Step Guide

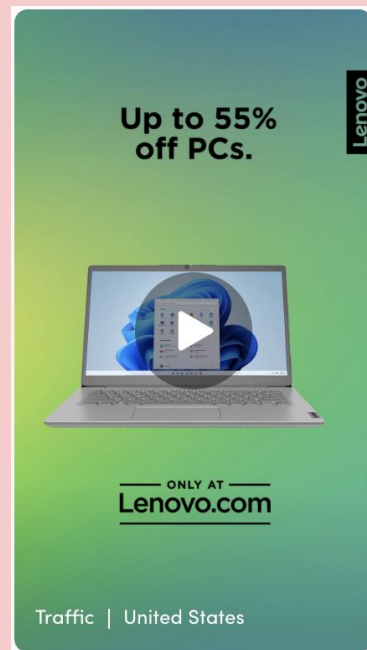

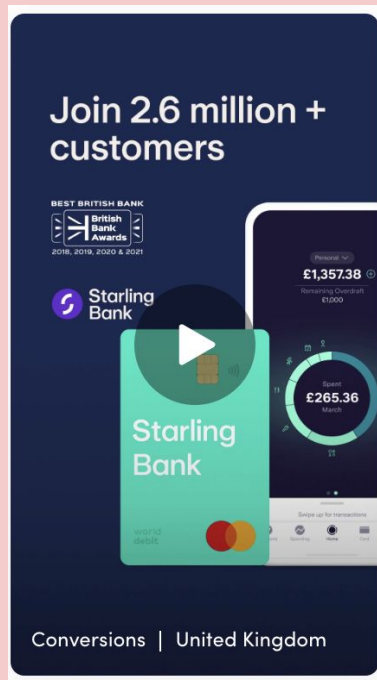

Best Performing Creative Angles: Examples

Testimonial Review

Creative Angles: DON'T DO THIS

Overly branded content

Lesson Recap

1. Follow best practices to hook prospects in
2. Stick to native creator content to keep ad costs low
3. Use top performing creative angles to better chances of success
4. Avoid running overly branded/designed ads

Lesson 6

Scaling

Creative 201: The Research

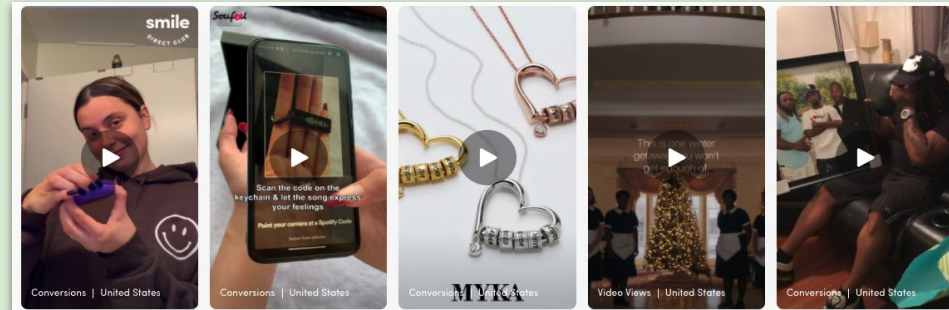

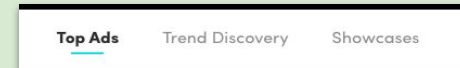

In this lesson, we will cover:

1. **Creative Research: Inspo**
 - a. Learn how and where to conduct creative research to produce your next winning ads
2. **Creative Research: Trends**
 - a. Tap into go-to resources to help your ads leverage the powerful Tiktok algorithm
3. **The Core Sales Message Framework**
 - a. Discover the step-by-step avatar research process for crafting winning messaging.

Creative Research: Inspo

1. Follow top influencers in your industry and study their best performing videos
2. Study top ads and trend discovery in creative center
3. Use: [Top Ads Library](https://ads.tiktok.com/business/creativecenter/inspiration/topads)

URL: <https://ads.tiktok.com/business/creativecenter/inspiration/topads>

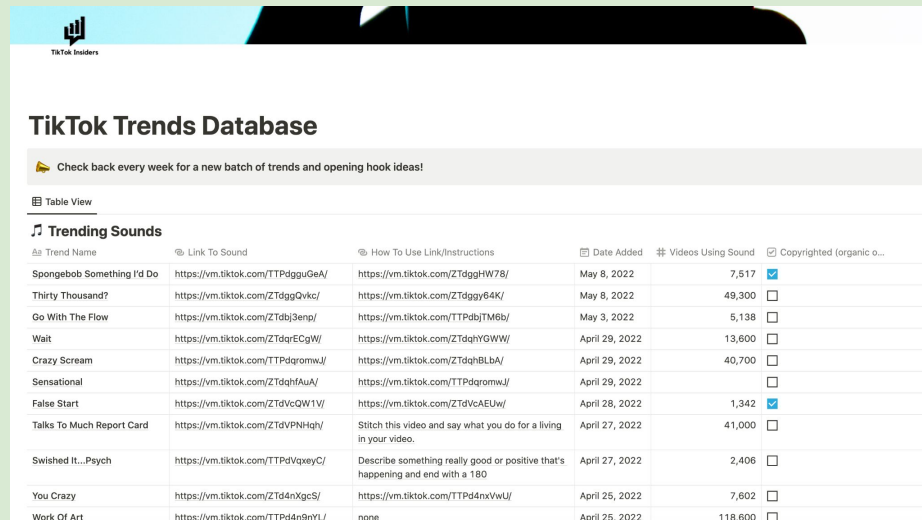

Creative Research: Trends Database

1. Trending Sounds
2. Text Overlays
3. Opening Hooks

Creative Research: Finding Creators

1. DIY - Source your own creators
 - a. (Better when you're starting / Cost efficient)
2. DFY - Work with a UGC creative agency, who already knows the ins-and-outs
 - a. (Better when you're scaling / Need volume)

Creative Research: Sourcing Creators

Leverage Creator Marketplace

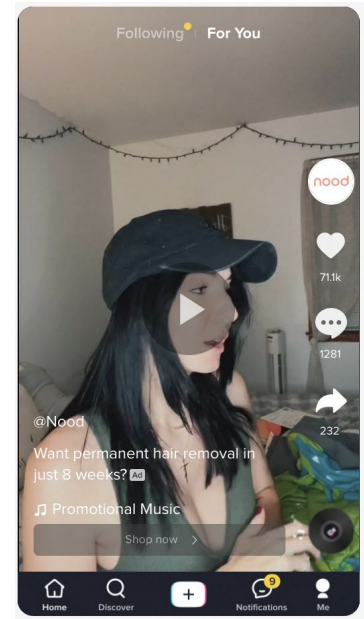

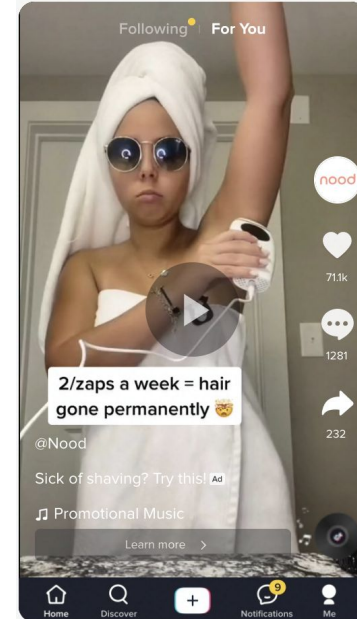

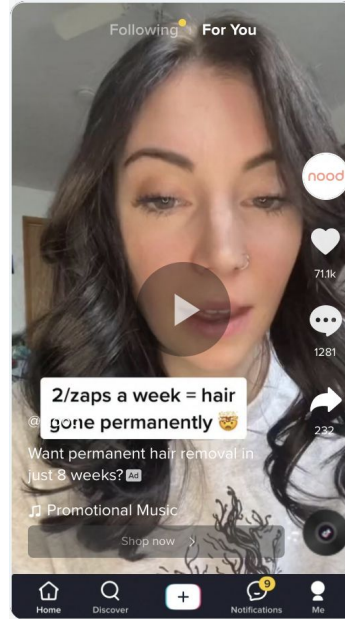

1. Find creators with experience in your niche
2. Negotiate per video contracts
3. Pricing ranges from \$20-\$1000+ per video
4. Provide scripts for them to create videos

Creative Research: Sourcing Creators

Testing**

Lesson 5

Optimization

Lesson 6

Scaling

Creative 301: How To Make TikToks That Convert

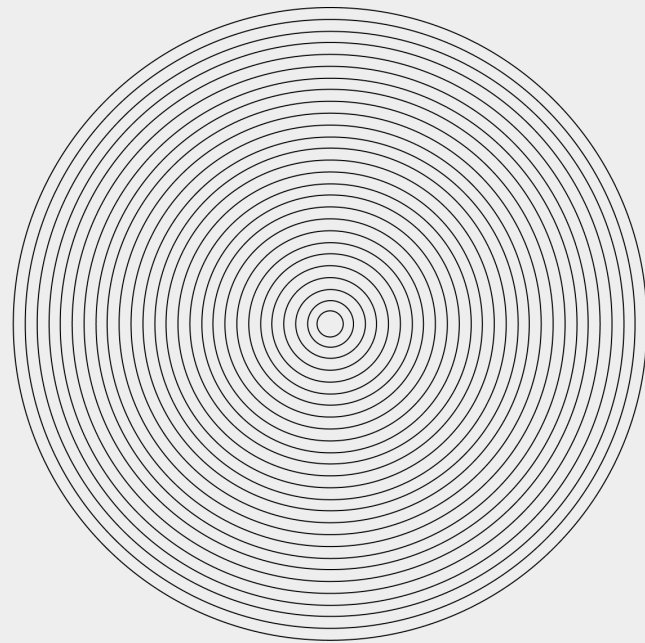

In this lesson, we will cover:

1. **The focus for each ad creative**
 - a. Discover how to capture attention in a 3s world
2. **How to engage your audience**
 - a. Apply winning tactics to make your ads not look like ads
3. **An easy-to-follow winning framework**
 - a. Craft winning Winning Ads consistently with go-to frameworks to follow
4. **Winning Ads Teardown**
 - a. Discover a detailed breakdown of some of my best ads + what helps them drive sales

The Focus

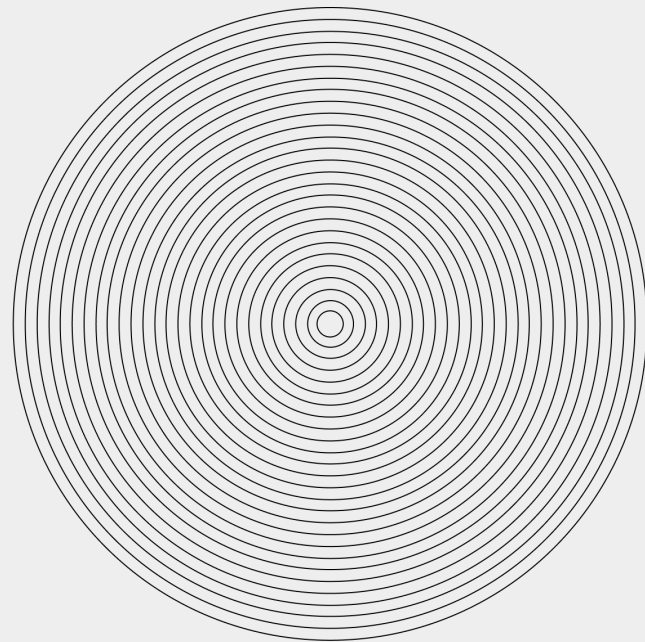

- Engage
- Entertain
- Educate

Users are there to laugh, cry and be amused NOT view your ads.

How To Engage > Entertain > Educate

- Talk to me - say it how you would to a friend in your IG story
- Story: beginning / middle / end
- Disruptive
- Not hard sell
- Engage / Educate / Entertain
- VERY NATIVE - More like an "IG Story" less like an Ad
- Trending overlays/editing
- Trending sounds/music
- High CPM = Creative not resonating
- Cannot scale with High CPM creatives

The Winning Ad Formula™

1. The Hook

- a. Pain
- b. Value foreshadow (Desire for gain: Questions you have)
- c. Funny
- d. Pattern interrupt
- e. Controversial

2. Pain

3. Solution

4. Objection Handle

5. Offer

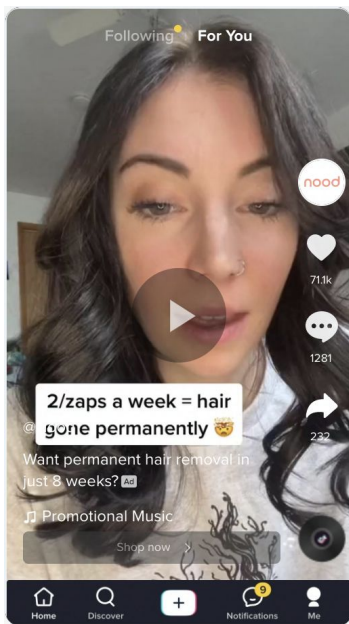

The Winning Ad Formula™

“The Better Way” - Triggering An Emotional Response

- **New**
 - a. Can I get this anywhere else?
 - b. What is unique about these?
- **Fast**
 - a. How fast will this happen?
 - b. How will this help do what I'm doing now but faster?
- **Safe**
 - a. How safe is it?
 - b. How is this better than what I have now?
- **Easy**
 - a. How is this easier than what I have now?
 - b. How much simpler is this than what I have now?
- **Big**
 - a. How big is the result (5X more Y)?
 - b. How much money will this save me (5X more money)?
 - c. How much time will this save me?

Testing**

Lesson 5

Optimization

Lesson 6

Scaling

Setup & Testing: Lesson Objectives

In this lesson, we will cover:

1. **Common Mistakes To Avoid**
 - a. Learn the common pitfalls to avoid the creative testing roller coaster & scaling plateau
2. **How to win Creative Testing**
 - a. Learn the 8 keys to winning creative testing for long-lasting scale
3. **The SVST Testing Method™**
 - a. Structure your campaigns for maximum clarity + performance
4. **How to start**
 - a. Discover the best way to start on Tiktok to ever have a chance of generating conversions
5. **Launching Phase 1 - Message Testing**
 - a. Learn how to leverage your data to find out what messaging actually resonates with your audience and is something they care about
6. **Launching Phase 2 - Creative Testing**
 - a. Learn how to find winning ads regularly and gain 100% clarity on what's actually working

Common Mistakes To Avoid

1. Underestimating the quantity of creative you will need for TikTok
2. Testing too many things at once. Sound familiar? creative, audiences, headlines, thumbnails, products, you name it
3. Not knowing 100% what's actually working - with so many variables in play at once with creative, audiences, headlines, thumbnails, products
4. Not having a focused process for testing - especially when reacting constantly to the account
5. Changing the way you make decisions (daily) - almost each time on what's a winning ad creative
6. Not having enough creative to test or an easy way to speed up creative output

Can you imagine if 80% of your testing was based on UNPROVEN elements day-to-day?

CXL

CXL

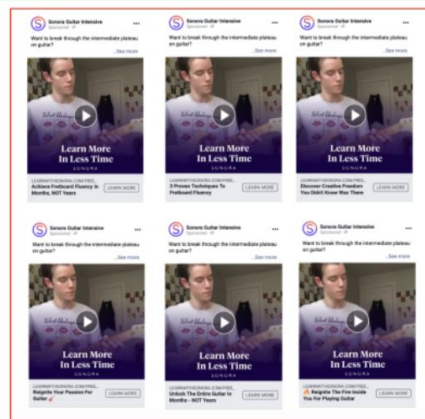

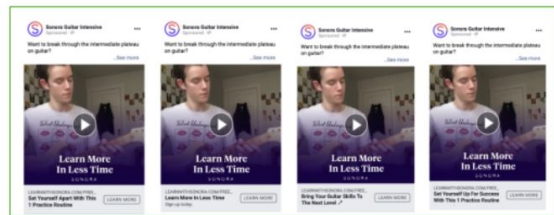

How To Win Creative Testing

1. Use Ad Variable Isolation™
2. Use a repeatable Testing System - ie. SVST Testing & Scaling System™
3. Use Message-Driven Targeting™ - without detailed targeting / to go broad
4. Stick to the Winning Ad Formula™ - 80/20 Principle
5. Increase message testing volume
6. Prioritize the hook
7. Use your BEST audience only
8. Kill ad sets early

Isolate only
one variable **at a time.**
CXL

Ad Variable Isolation™

1. This philosophy = 100% clarity on what's working (or not)
2. Isolate variables in testing (see SVST) for 100% clarity on what's actually working: Hook, Ad Text, Headline, Text Overlay, Image, Video or CTA
3. When combined with iterative decision-making process = constantly beating your control (reduce CPA to unlock scale)

EXAMPLE:
AD VARIABLE ISOLATION
TEST

Testing System: The SVST Testing Method™

The SVST Testing Method™

- **Phase 1 - Message Testing**
- **Phase 2 - Creative Testing***
- **Phase 3 - Audience Testing**
- **Phase 4 - Scaling**

TikTok Algorithm Optimizes

- $(CPA \times 50) / 7 = \text{ad set daily budget}$
- $(\$50 \times 50) / = \357 per day

** Stay on while scaling. Always testing.*

*** TikTok needs 50 conversions/week per audience to optimize effectively, which is how budget is determined.*

**Just because your campaign says
“TOF | Cold Traffic” doesn’t mean your
ACTUALLY reaching cold traffic.**

CXL

CXL

**You shouldn't need
"audiences" to run ads at an
extremely high level.**

CXL

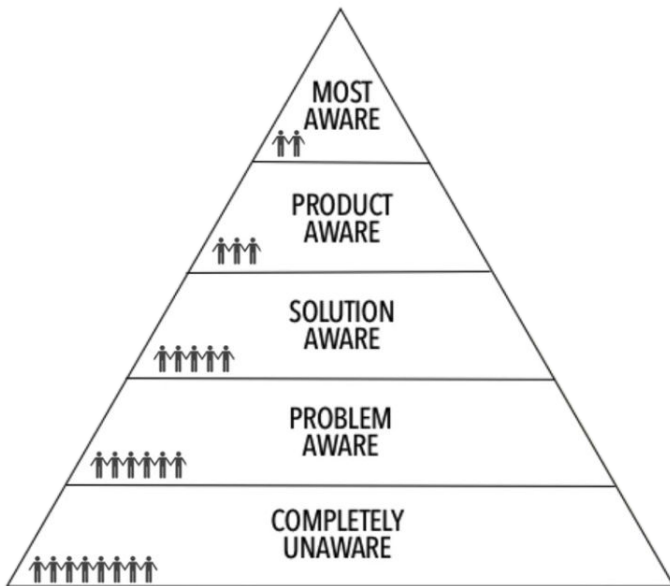

Message-Driven Targeting™

Are you targeting the right prospects?

BOF
Solution
Aware

MOF
Problem
Aware

TOF
Problem
Unaware

Highest Intent/Highest Converting:

These are the best immune-boosting mushrooms - *a difference you can feel.*

Average Intent/Average Converting:

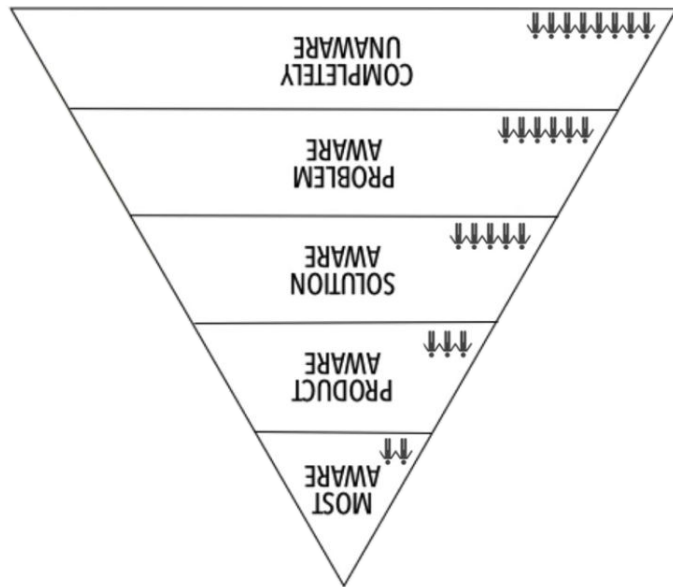

These aren't your average mushrooms.

Lowest Intent/Lowest Converting:

Are you missing out on nature's most powerful superfood?

Message-Driven Targeting™

TOF
Problem
Aware

Match your messaging (ad copy) to the level of awareness your prospect has!

TOF: Problem Hooks

- Can't scale your TikTok Ads?
- Struggling with bloating or fatigue and Ready for a reset?

TOF: Proclamation Hooks

- 1 in 3 cats suffers from kidney disease caused by poor hydration.
- Online sales hyper-growth is achieved by performance, not sales pitches.

Sticking to The Winning Ad Formula™

1. Squeeze more juice from the orange by going deeper not wider
2. Focus 80% of day-to-day testing on variations of Winning Ads
3. Limit the new creative ideas to 20% or less of day-to-day testing
4. Be insanely disciplined towards this approach

How To Start: Audience Selection

- STEP 1 - Pick the audience you KNOW your prospect lives in (interests)
 - Broad (Interests)
 - Health & Wellness
 - Personal Care
 - Broad (Open)
 - W18-45
 - M18-45

Screen record day of in account:
Ad Group level

How To Start: Pixel Optimization

Pixel Optimization is required - DO NOT SKIP THIS

- STEP 2 - Optimize for VIEWCONTENT
 - Get 50 conversions in less than (7) days before progressing to step 2
- STEP 3 - Optimize for ADDTOCART
 - Get 50 conversions in less than (7) days before progressing to step 3
- STEP 4 - Optimize for PURCHASE
 - Optimize for Purchase once obtaining > 100+ conversions in steps 1 + 2

Screen record day of in account:
Ad Group level

Testing System: The SVST Testing Method™

The SVST Testing Method™

- **Phase 1 - Message Testing**
- **Phase 2 - Creative Testing***
- **Phase 3 - Audience Testing**
- **Phase 4 - Scaling**

TikTok Algorithm Optimizes

- $(CPA \times 50) / 7 = \text{ad set daily budget}$
- $(\$50 \times 50) / = \357 per day

** Stay on while scaling. Always testing.*

*** Tiktok needs 50 conversions/week per audience to optimize effectively, which is how budget is determined.*

Screen record day of in account:
Ad Group level

There is no scaling without **testing process.**

CXL

Testing System: SVST Testing Method™

Phase 1 - Message Testing

- Goal: Test new headlines & hooks on low budgets
- Campaign Objective: Traffic
- Speeds up testing & insights into what customers want
- Find new angles to put into creative production
- 10 variants test for \$25-\$35 each in 24 hours

Intention

- *Find new hooks when testing with a proven creative*
- *Find new headlines when testing with a proven hook & creative*
- *Find new text overlay when testing with a proven hook & headline*

Setup

- *Option 1 - To find a new hook, test (10) new hooks with 1 proven creative + 1 proven headline*
- *Option 2 - To find a new headline, test (10) new headlines with 1 proven creative + 1 proven hook*
- *Option 3 - To find a new text overlay, test (10) new headlines with 1 proven creative + 1 proven hook*

What to do next

- *Take the top 3 hooks (highest CTR) and go test them with other proven creative in Phase 2*
- *Take the top 3 headlines (highest CTR) and go test them with other proven creative in Phase 2*
- *Take these hooks & headlines and place them as text overlay on your Winning Ads*

Testing System: SVST Testing Method™

Phase 1 - Message Testing (example)

- Goal: Test new headlines & hooks on low budgets
- Campaign Objective: Traffic
- Speeds up testing & insights into what customers want
- Find new angles to put into creative production
- 10 variants test for \$25-\$35 each in 24 hours

Screen record day of in account:
Ad Group level

Testing System: SVST Testing Method™

Phase 2 - Creative Testing

- Goal: find new winning ads / keep separate from scaling
- Objective: Conversion
- Setup
 - Creatives & Copy assigned unique identifier | i.e. 1001-a
 - New Creative + Proven Copy tests to proven audiences | ABO
 - Proven Creative + New Copy tests to proven audiences | ABO
- Kill Point: 2x CPA = Loser
- Winners: 10x conversions @ CPA

Intention

- Get clarity on exactly what is working: the image, the copy, the headline, the text overlay
- Keep Winning Ads going longer through variation testing (hooks, headlines, thumbnails)
- Build the Winning Ads bucket for scaling
- Limit the amount of "new ideas" = consistency - 80/20

Setup

- Option 1 - To find a new Winning Ad creative, test (3-5) new images with 1 proven copy + 1 proven headline
- Option 2 - To find a new Winning Ad creative, test (1) new image with (3-5) proven copy + 1 proven headline
- Option 3 - To find a new Winning Ad creative, test (1) new image with 1 proven copy + (3-5) proven headlines

What to do next

- Protect ROI by killing an underperforming ad set early (2-5X CPA)
- If the Ad Set clears the early kill point, optimize the ad level next
- Kill underperforming ads that are not to KPI
- Find the best of the best Winning Ad & move it to your scaling campaign

Testing System: SVST Testing Method™

Phase 2 - Creative Testing (Example)

- *Goal: find new winning ads / keep separate from scaling*
- *Objective: Conversion*
- *Setup*
 - *Creatives & Copy assigned unique identifier | i.e. 1001-a*
 - *New Creative + Proven Copy tests to proven audiences | ABO*
 - *Proven Creative + New Copy tests to proven audiences | ABO*
- *Kill Point: 2x CPA = Loser*
- *Winners: 10x conversions @ CPA*

Screen record day of in account:
Ad Group level

Lesson Recap

1. Avoid common pitfalls to make Tiktok a performing channel
2. Test one variable at a time to have control over your results
3. Implement a detailed & replicable testing procedure in order to produce consistent results
4. Prioritize your hook to keep winning ads going

Optimization

Optimization

Lesson 6

Scaling

Optimization: Lesson Objectives

In this lesson, we will cover:

1. **How to troubleshoot non-converting ads**
 - a. Discover how to read your data & find out what's working + what's not
2. **Detailing your Winning Ad Formula™**
 - a. Learn an easy-to-follow template to craft your focus & future testing around what's actually working
3. **Optimizing from your Winning Ad Formula™**
 - a. Discover how to keep winning ads going + how to refine your day-to-day approach to avoid drastic drops in performance

How To Troubleshoot Non-Converting Ads

- How to setup columns
- How to read CPM, CTR, CVR, AOV

Screen record day of

**Focus 80% of your testing on
PROVEN elements day-to-day.**

CXL

Your Winning Ad Formula

- SEE DOSSIER
- Fill out your Winning Ad elements

[illegible]

Optimize the Scroll-Frame to keep Winning Ads going **LONGER.**

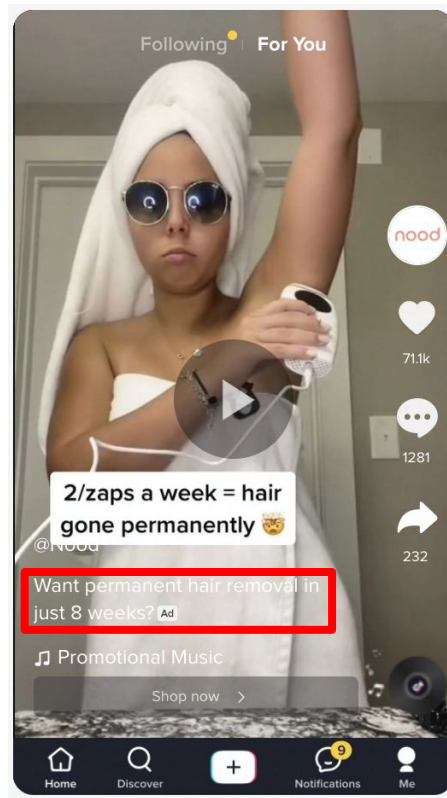

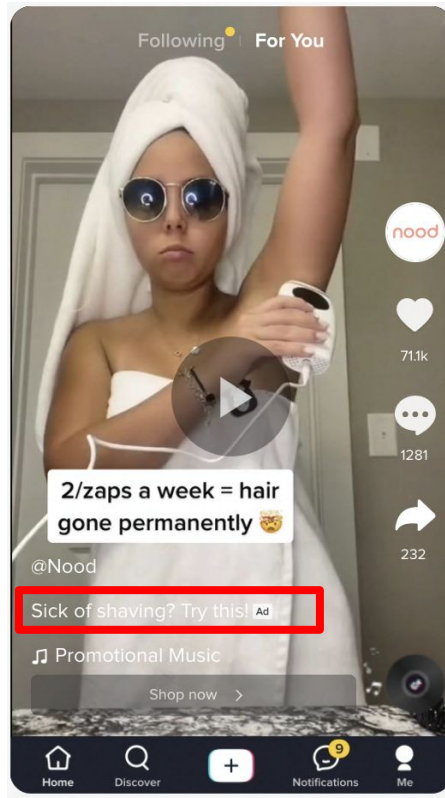

Hint: This is the 80% of what you should test day to day.

CXL

Optimizing From Your Winning Ad Formula

Scroll-Frame Optimization: Variations of your Winning Ad

1. Optimizing Text Overlay Headlines
 - a. Promise Headlines - 3-4
 - b. Proclamation Headlines - 3-4
 - a. Benefit/Solution Headlines - 3-4
2. Optimizing the avatar:
 - a. Older (30-35) black female: 3-4 different avatars
 - b. Older (30-35) white female: 3-4 different avatars
 - c. Older (30-35) asian female: 3-4 different avatars
3. Optimizing the hook:
 - a. Optimize the first 3-5 seconds
4. Optimizing the background color
 - a. Pink w/ black text
 - b. Teal w/ white text

**There are hundreds of versions of this
Winning Ad that you could create
with PROVEN elements**

CXL

Lesson Recap

1. Setup your reporting properly to avoid killing winning ads
2. Detail your Winning Ad Formula to prevent going off track
3. Optimize from your Winning Ad Formula to keep performance on track
4. Dial in your focus with intentional vs. randomized testing

Lesson 6

Scaling

Scaling: Lesson Objectives

In this lesson, we will cover:

1. **Scaling with Phase 3 - Audience Testing**
 - a. Discover how to lay the foundation for scaling
2. **Scaling with Phase 4 - Scaling Campaigns**
 - a. Discover how to maximize Winning Ads + keep your account stable

Scaling is easy when
you've proven what *actually works.*

CXL

Testing System: SVST Testing Method™

Phase 3 - Audience Testing

- Goal: find new winning audiences / keep separate from scaling
- Objective: Conversion
- Setup
 - Proven Ads to unproven audiences / ABO
 - Start with standard audiences / i.e Broad, Broad Interest, 10% Buyers List
 - Kill Point: 2x CPA = Loser
 - Winners: 10x conversions @ CPA
- Kill Point: 2x CPA = Loser
- Winners: 10x conversions @ CPA

Intention

- *This is the beginning of initial scaling*
- *You want audiences big enough for scaling (Broad / Large Interests / 10% Buyers List)*
- *Find winning audiences for Scaling Campaign*

Setup

- *Option 1 - To find a new Winning Ad audience, test (3-5) proven creatives, with proven copy + proven headline*

What to do next

- *Protect ROI by killing an underperforming ad set early (2-5X CPA)*
- *If the Ad Set clears the early kill point, optimize the ad level next*
- *Kill underperforming ads that are not to KPI*
- *Find the best of the best Winning Audiences & move it to your Scaling Campaign*

Testing System: SVST Testing Method™

Phase 3 - Audience Testing (example)

- *Goal: find new winning audiences / keep separate from scaling*
- *Objective: Conversion*
- *Setup*
 - *Proven Ads to unproven audiences / ABO*
 - *Start with standard audiences / i.e Broad, Broad Interest, 10% Buyers List*
 - *Kill Point: 2x CPA = Loser*
 - *Winners: 10x conversions @ CPA*
- *Kill Point: 2x CPA = Loser*
- *Winners: 10x conversions @ CPA*

Phase 4 - Scaling

- Goal: maximize winning ads & audiences
- Objective: Conversion
- Setup:
 - Proven audiences + Proven ads | CBO
 - Use ABO, Bid Caps, Cost Caps set at algo optimization target**
- Rips untils over CPA

Intention

- You must set your budget high enough to produce 50 conversions per audience/ad set
- You want audiences big enough for scaling (Broad / Large Interests / 10% Buyers List)
- Scaling requires so much spend, you want only your best Ads & Audiences here

Setup

- **Option 1: Single Ad Scaling** - ABO budget - ad set budget set at 50 conversions per week x CPA / 7 (Ie. \$357/day for \$50 CPA) with #1 best ad
- **Option 2: ABO Scaling** - ABO budget - ad set budget set at 50 conversions per week x CPA / 7 (Ie. \$357/day for \$50 CPA) with #3-4 best ads
- **Option 3: CBO Scaling** - CBO budget - 3-5 audiences, campaign budget set at 50 conversions per week x CPA / 7 (Ie. \$357/day for \$50 CPA) with #3-4 best ads
- **Option 4: Manual Bidding** - Cost Cap - Test at 1X CPA, 1.5X CPA, 2X CPA to see where you get delivery with #3-4 best ads
- **Option 5: Pocket Theory Scaling** - 1 audience - Pocket Theory - Duplicate your winning audience 3-5X with 3 winning ads per ad set

What to do next

- Protect ROI by killing an underperforming ad set early (2-5X CPA)
- If the Ad Set clears the early kill point, optimize the ad level next
- Kill underperforming ads that are not to KPI
- Find the best of the best Winning Audiences & move it to your Scaling Campaign

Testing System: SVST Testing Method™

Phase 4 - Scaling: A Closer Look

- **Option 1: Single Ad Scaling** - ABO budget - ad set budget set at 50 conversions per week x CPA / 7 (I.e. \$357/day for \$50 CPA) with #1 best ad
- **Option 2: ABO Scaling** - ABO budget - ad set budget set at 50 conversions per week x CPA / 7 (I.e. \$357/day for \$50 CPA) with #3-4 best ads
- **Option 3: CBO Scaling** - CBO budget - 3-5 audiences, campaign budget set at 50 conversions per week x CPA / 7 (I.e. \$357/day for \$50 CPA) with #3-4 best ads
- **Option 4: Manual Bidding** - Cost Cap - Test at 1X CPA, 1.5X CPA, 2X CPA to see where you get delivery with #3-4 best ads
- **Option 5: Pocket Theory Scaling** - 1 audience - Pocket Theory - Duplicate your winning audience 3-5X with 3 winning ads per ad set

Testing System: SVST Testing Method™

Phase 4 - Scaling (example)

- *Goal: maximize winning ads & audiences*
- *Objective: Conversion*
- *Setup:*
 - *Proven audiences + Proven ads | CBO*
 - *Use ABO, Bid Caps, Cost Caps set at algo optimization target***
- *Rips untis over CPA*

Lesson Recap

1. Maximize winning ads for more stable performance
2. Scaling should be easy when you've put in the work beforehand
3. Consistency comes from confidence knowing you have the clarity on what is actually working
